Specialised shade sail solutions for schools,
child care centres and parks

Shade sail solutions for schools

Custom designed and manufactured in WA

We are a Western Australian owned and operated family business with more than 30 years of experience

Custom Design

Our products are designed to meet your specific needs including matching the colour scheme of sails, webbing and posts to your school colours, and selecting the best sail size, shape, twist and positioning to optimise shade coverage for the most desired time of day.

We offer a range of products specifically catered to school customers, including nursery grade sails for vegetable garden projects, carpark sails for protecting staff vehicles from the harsh sun and sail structures in school house colours that are ideal for community events and school sports carnivals.

Maximum protection with minimum posts for carparks

Nursery grade shade cloth for veg gardens

Sails in school house colours for sports carnivals

Vibrant colours, optimised shade & max UVR blocking

Western Australia's premier shade sail company

We recognise the importance of nature play spaces for the healthy development of children and offer a range of products and services that are tailored to meet the specific safety and quality requirements of schools

Safety

We work according to ASSA Standards and safe work method requirements for shade sail installation which comply with current legislation in all Australian States and Territories .

We design and install all products according to engineering specifications and strictly observe regulations unique to playground construction including keeping fall zones unobstructed and ensuring adequate clearance between the top of play equipment and shade sails.

Our Products

We use extra heavy duty knitted shade cloth supplied by Polyfab Australia—a recognised world leader in the manufacture of premium quality shade cloth fabrics.

The shade cloth is UV stabilized and provides shade and UVR block factors of over 96% depending on choice of colour.

All shade sails carry a 10-15 year UV warranty and are sewn with thread that carries a 15 year warranty.

With 20 vibrant colours to choose from, we are confident that we can create a shade sail solution to match your school's colour scheme.

Shade sail maintenance and repair

*Often overlooked,
shade sail maintenance is critical
to the life and appearance of the
product and to the prevention of
injury and property damage*

Shade sails that are dirty or have a build up of mold become heavy and block the natural flow of air through the fabric. This places unnecessary strain on the fixings and knitting of the sail and reduces the lifespan of the product.

Shade sails that are tensioned with incorrect fixings or that have become slack over time are unsightly and dangerous. Slack shade sails are more susceptible to the wind which can cause irreparable stretching of the sail fibres resulting in 'bubbles' and the inability to correctly re-tension the sail. This increased vulnerability to the wind also increases the risk of shade sails becoming loose from anchor points which can cause serious injury and damage as fixings that remain

We also recommend that customers consider removing shade sails for the winter months and make use of our maintenance program. Service includes:

- Removal of sails for winter
- Safety inspection of fixings, anchors and posts
- Inspection of sails for damage and deterioration
- Cleaning and reconditioning of sails if necessary; the thread we use for stitching is new to the market and holds a 15 year warranty
- Bagging, tagging and storage of sails
- Re-installation and tensioning before summer returns

Our comprehensive safety inspections include written reports itemised according to Australian safety standards
